OUR EQUIPMENT:

NIGERIAN CONTENT

1. **OWNERSHIP STRUCTURE**

The board of Directors of Birth Resource Project Ltd, is made up of

- i. Mr. Bankole Dominic - Executive Director (MD/CEO)
- ii. Mrs. Rita Dominic - Executive Director

2. **NIGERIA CONTENT DEVELOPMENT PLAN**

For the growth and development of the Nigerian Oil and Gas sector, the Federal Government deemed it necessary to initiate and develop a master plan that will in no distant future, place the industry in the hands of the Nigerian entrepreneur. By 2010, the Federal Government had a target of 75% indigenous input, while the remaining 25% remain in the domain of foreign based companies and enterprises. The objective of the local content development initiative are as enumerated below:-

- Increase value added content hereby contributing to national economic development as well as that of our stakeholders, partners, clients, companies, employees as well as contractors.
- Transfer technology and develop local know-how: The Nigerian Content Development Scheme, enables the local entrepreneurial space to develop and increase their knowledge of what the petroleum industry entails. Engagements such as joint ventures, partnership, sub-contracting and other mutually suitable schemes are put in place to facilitate the transfer of knowledge of the petroleum industry to local contractors.
- To minimize capital flight: The re-engineering of oil and gas sector of the petroleum industry in favour of the indigenous contractors, help to bring to the barest minimum the issue of capital flight from Nigeria to the outside world.

Employment benefit for host communities: Jobs hitherto handled by foreigners, are left for indigenous companies to do. This had no doubt reduced the unemployment market to no small measure.

Cost effectiveness: prohibitive cost of doing business in Nigeria, when the foreign companies held sway, had gone down now that local companies and personnel are in charge of sensitive position and job. Costs have reduced considerably since when the act became effective.

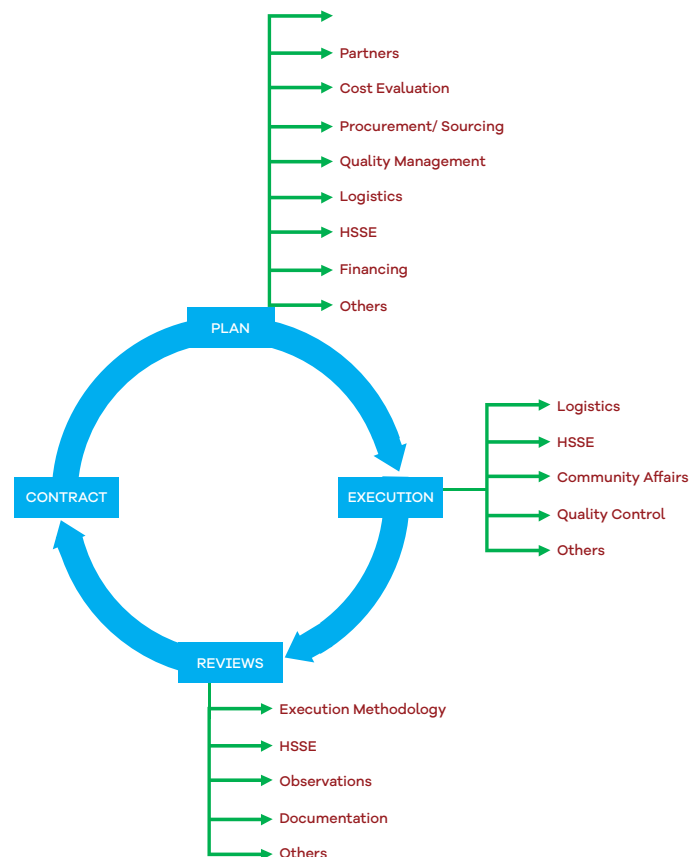

SHARES/FINANCIAL STATUS

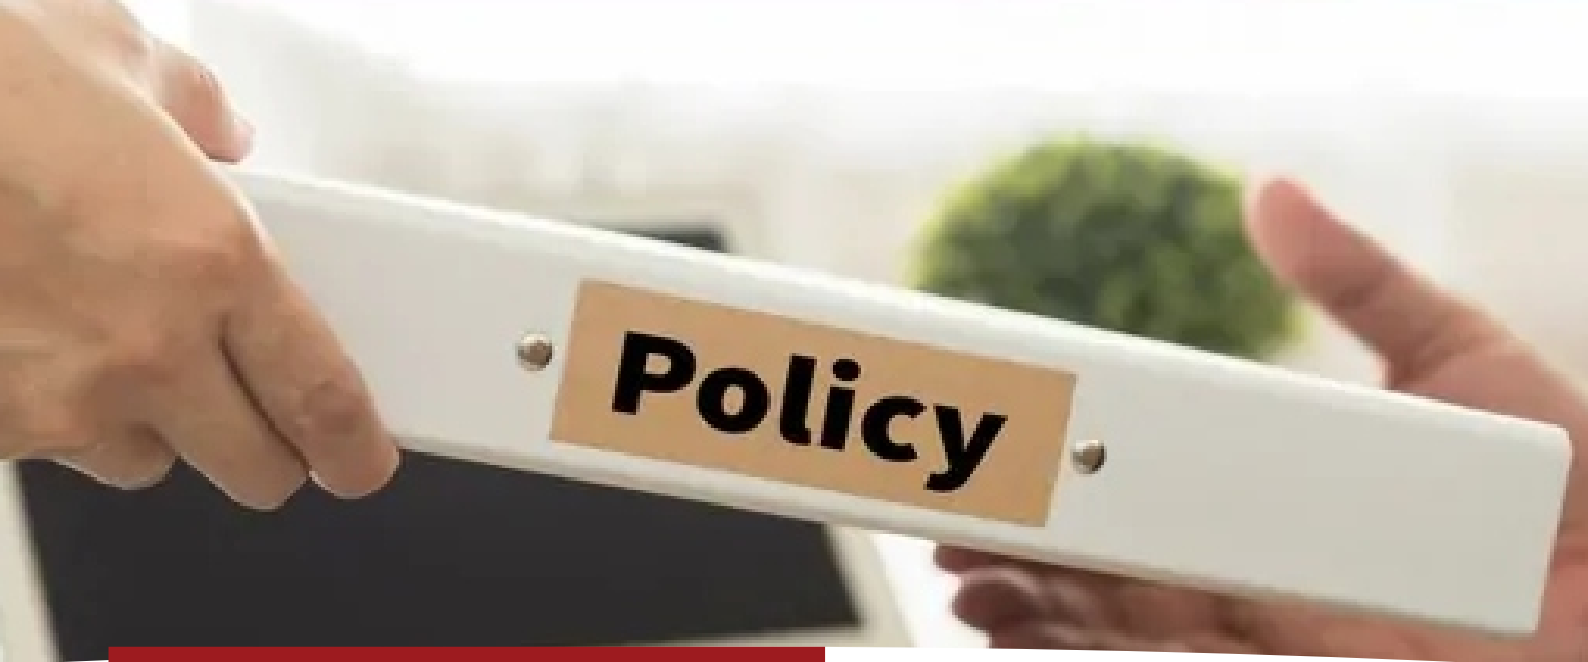

Paid Up Share Capital The two (2) members of the board of Directors are responsible for providing whatever financial requirement that might be needed for the execution of jobs secured. Besides, financial contributions by the various board members, our bankers which has reposed confidence on us for the past years of doing business with them, also give us loan for such executions. Necessary collaterals are also readily available, when such occasions arise.

POLICIES EXTRACTS

HSE POLICY

Birth Resources Projects Limited is aware of the hazards associated with work environment, engineering activities and any other jobs in the marine sector and the adverse consequences of failure to observe, check and control or totally eliminate the unsafe acts and conditions that could result in accident to personnel. To this end the company has fashioned out ways and means to eliminate or bring to the barest minimum effects of accidents on men and materials at the work place. This involves training of personnel, on how to implement procedures that involves safe work practices by showing their understanding of job task assigned to them. Birth Resources Projects Limited to this regard shall ensure that every safety procedure are followed religiously in line with client standards and statutory regulations.

Thus, we are committed to:

- Pursue the goal of no harm to people, environment & equipment.
- Ensure that no work activity shall be carried out unless considered safe.
- Accident free and lost time injury-free project.
- Strive to use resources efficiently and minimize waste & the impact on environment.
- Encourage pro-active relationship with host community.
- Strive to enhance security of personnel & equipment.
- Promote good personal health among project personnel.
- Abide by client HSE specification or guideline

QUALITY ASSURANCE AND QUALITY CONTROL POLICY

Birth Resources Projects Limited has established its quality assurance and control manual which includes a quality assurance program plan that describes the system and policies employed in the design, procurement, fabrication, construction and all other business areas which were essential in meeting the requirement of all Birth Resources Projects Limited entities, clients and applicable codes, specifications and standards.

The managing director, general manager or project manager as applicable at each project office is responsible for the performance of that office. Authority for the administration of the QA program plan is delegated by the person in charge of that specific office, to the QAC manager to implement this mandate and obtain compliance with its requirement. It is further understood that the QAC manager shall have the authority and freedom with the organization to identify problems and to initiate, recommend solutions and implement the appropriate preventive and corrective measures to resolve problems / challenges if any.

The management of Birth Resources Projects Limited approves the content of our quality management manual and recognizes its responsibility to support and assures compliance with the policy, procedures, practices described herein.

COMMUNITY AFFAIRS POLICY

As an indigenous company, Birth Resources Projects Limited has a policy which incorporates the interest of the stakeholders of the project host community as well as relevant government agencies in order to ensure smooth operations and cordial relationship. About 90% of our workforce shall originate from the host community. The company's project community Liaison Officer shall be employed from the community and he shall coordinate the company's activities with respect to the host community to ensure early and easy flow of information between the two parties and also third parties. Minor subcontractors and supplies shall also be given to persons from host community.

LOCAL CONTENT POLICY

In line with the Federal Government of Nigeria's policy on local content development strategy, Birth Resources Projects Limited here states as follows:

- That in pursuant of this noble policy of the Government, Birth Resources Projects Limited will as much as possible, source all locally made materials needed for our operations through local vendors and sub - contractors
- Employment and engagement of host community staff in carrying out jobs, thereby empowering and transferring technology. This is aimed at making a considerable investment in the manpower development of the host community
- Adequate empowerment of Nigerian staff, whereby Nigerian management staff are involved in high level decision making in the running of different departments of the company
- Nigerians play pivotal roles in various aspects of the business from inception of project to commissioning. This is to enhance commitment to transfer of technology, employment generation and competence development

- Develop local expertise through improved training, supervision and delegation of duties to ensure effective participation
- The above will be achieved without compromising total quality delivery. the Company states a commitment to achieving this policy statement.
